QUESTION: 60

When installing a new switch, you want to apply a security banner when you log into a switch Which two access methods will display the banner? (Choose two)

- A. telnet
- B. Web Tools
- C. SNMPv3
- D. SMI-S

Answer: A, B

Explanation:

Most organizations display a standard welcome message or banner at system login. Although this type of login banner might not be a major deterrent, it can help minimize liability and provide legal support in the event of a security breach, and it should be standard practice for any IT security strategy. With the 7.0 release, Brocade allows SAN administrators to define and display a pre-login Message of the Day (MOTD) as well as a security banner message displayed after logging in. Normally admins use telnet and/or Web tools to log into a switch. Since when they log in the security banner will be displayed.
