Question: 56

What type of data is contained in the value of the _id of a JSONStore Document?
A. A user defined unique integer
B. A user defined alpha‑numeric key
C. An automatically generated unique integer
D. An automatically generated hash‑identifier

Answer: D

Explanation:
A JSONStore document is a JSON object with an automatically generated identifier (_id) and JSON data. It is similar to a record or a row in database terminology. The value of _id is always a unique integer inside a specific collection. Some functions like add, replace, and remove in the JSONStoreInstance class take an Array of Documents/Objects. These methods are useful to perform operations on various Documents/Objects at a time.
