### Question: 85

Which line instructs ansible to install httpd?

- A. yum: name=httpd state=installed**
- B. tasks: install httpd**
- C. service: name=httpd state=installed**
- D. name: service=httpd state=installed**

Answer: A

*Explanation:*

*The yum module is an appropriate way to install software*

### Question: 86

Which Ansible ad-hoc flag is analogous to the become directive?

- A. b**
- B. f**
- C. i**
- D. B**

Answer: A

*Explanation:*

*The b flag actually stands for become! They both have Ansible escalate to the become\_user.*

### Question: 87

### Question: 88

What is the primary difference between the shell and command module?

- A. The shell module is for executing shell commands, and the command module is for Ansible internal commands.**
- B. The shell module sets up a shell environment and the command module only runs the provided command.**
- C. The shell module sets a default shell whereas the command module executes a shell command.**
- D. There is no difference.**

Answer: B

### Question: 89

Which command is the correct way to run the playbook /home/ansible/Buildwww.yml using the inventory file /home/ansible/inventory, assuming your present working directory is /home/ansible?

- A. ansible -i inventory Buildwww.yml**
- B. ansible -i inventory -p Buildwww.yml**
- C. ansible-playbook -i inventory -p Buildwww.yml**
- D. ansible-playbook -i inventory Buildwww.yml**

Answer: D

Explanation:

*This command is the correct way to run the playbook using the requested inventory*

Question: 90

Consider the following playbook.

- hosts: webservers become: yes
- name: install httpd yum: name: httpd state: latest

Which line includes a syntax error?

- A. become: yes – there is no attribute called become**
- B. yum: – yum should be proceeded with a hyphen**
- C. The file does not end with end-playbook.**
- D. The playbook does not include the task directive.**

Answer: D

Explanation:

*The "task:" directive is required at the prior to providing the tasks of a playbook. Without it, Ansible will not throw an error.*

Question: 91

Which of the following attributes specifies how a handler can be notified? (Choose all that apply.)

- A. name**
- B. service**
- C. listen**
- D. handle**

Answer: AC

Explanation:

*While using the handler's name attribute is not encouraged, it does work.*

Question: 92

Question: 93

What command is used to run a playbook?

- A. ansible-playbook <playbook>**
- B. ansible <playbook>**
- C. ansible-p <playbook>**
- D. playbook <playbook>**

Answer: A

Explanation:

*This command will run a given playbook successfully.*

Question: 94

What keyword stores a command's output into a variable?

- A. register**
- B. output**
- C. output is stored in a variable named results by default**
- D. debug**

Answer: A

*Explanation:*

*The register keyword will store output from the preceding command into a provided variable.*

Question: 95

What does the lineinfile module do?

- A. Allow addition of lines anywhere in a file**
- B. Allows to grep for lines in a provided file**
- C. Allow additions of lines to the end of a file only**
- D. Input data into a file from stdin**

Answer: A

*Explanation:*

*The purpose of the lineinfile module is to add lines anywhere in a file passed on a pattern.*

Question: 96

Observe the details of the following dynamic inventory file. \$ ls -l dynamic.py -rw-rw-r-. 1 user user 1928 Mar 30 08:21 dynamic.py Why will this inventory file cause the ansible command to fail?

- A. Ansible cannot use python scripts as inventories.**
- B. The ansible user must own the file.**
- C. The file is not executable.**
- D. The ansible command will not fail using the noted file with the given details.**

Answer: C

*Explanation:*

*Without being executable. Ansible will attempt to parse the script as a static inventory and fail.*

Question: 97

Is it possible to specify multiple inventory files at once?

- A. Yes, you specify your inventory as a directory containing valid inventory files.**
- B. No.**
- C. Yes, you must provide extra parameters to the -i flag.**
- D. Yes, you must specify a reference inventory master file.**

Answer: A

### Question: 98

A dynamic inventory must return data in what format?

- A. JSON**
- B. XML**
- C. YAML**
- D. INI**

Answer: A

*Explanation:*

*Dynamic inventories must return JSON output.*

### Question: 99

Examine the following inventory excerpt file named `/home/user/ansible/inventory`. `[dbservers] db1.example.com`  
Which of the following files does Ansible check for variables related to that inventory? (Choose all that apply.)

- A. `/home/user/ansible/dbservers`**
- B. `/home/user/ansible/host_vars/db1.example.com`**
- C. `/home/user/ansible/host_vars/db1`**
- D. `/home/user/ansible/group_vars/dbservers`**

Answer: BD

*Explanation:*

*Ansible will check in `/home/user/ansible/host_vars` to find files named after hosts defined in the inventory. Ansible will check this file because there is a group defined in the inventory as `dbservers`.*

### Question: 100

Which flags must be accepted as input for a dynamic inventory script?

- A. Only `-list`**
- B. `-host [hostname]` and `-list`**
- C. `-host [hostname]` and `-inv-list`**
- D. `-list` and `-format [file format]`**

Answer: B

# SAMPLE QUESTIONS

*These questions are for demo purpose only. **Full version** is up to date and contains actual questions and answers.*

*Killexams.com is an online platform that offers a wide range of services related to certification exam preparation. The platform provides actual questions, exam dumps, and practice tests to help individuals prepare for various certification exams with confidence. Here are some key features and services offered by Killexams.com:*

**Actual Exam Questions:** *Killexams.com provides actual exam questions that are experienced in test centers. These questions are updated regularly to ensure they are up-to-date and relevant to the latest exam syllabus. By studying these actual questions, candidates can familiarize themselves with the content and format of the real exam.*

**Exam Dumps:** *Killexams.com offers exam dumps in PDF format. These dumps contain a comprehensive collection of questions and answers that cover the exam topics. By using these dumps, candidates can enhance their knowledge and improve their chances of success in the certification exam.*

**Practice Tests:** *Killexams.com provides practice tests through their desktop VCE exam simulator and online test engine. These practice tests simulate the real exam environment and help candidates assess their readiness for the actual exam. The practice tests cover a wide range of questions and enable candidates to identify their strengths and weaknesses.*

**Guaranteed Success:** *Killexams.com offers a success guarantee with their exam dumps. They claim that by using their materials, candidates will pass their exams on the first attempt or they will refund the purchase price. This guarantee provides assurance and confidence to individuals preparing for certification exams.*

**Updated Content:** *Killexams.com regularly updates its question bank and exam dumps to ensure that they are current and reflect the latest changes in the exam syllabus. This helps candidates stay up-to-date with the exam content and increases their chances of success.*

**Technical Support:** *Killexams.com provides free 24x7 technical support to assist candidates with any queries or issues they may encounter while using their services. Their certified experts are available to provide guidance and help candidates throughout their exam preparation journey.*
