Question: 52

A developer is using Postman to test a push notification via the Mobile Foundation REST API.

Which statement is true regarding the steps to accomplish this?

- A. An access token is not required if in a development environment.
- B. The Body element should contain the notification payload in XML format.
- C. A GET request should be sent to the endpoint `imfpush/v1/apps/<application-identifier>/messages`.
- D. The scope elements `messages.write` and `push.application.<applicationId>` must be added when configuring the Confidential Client.

Answer: D

Reference: <https://mobilefirstplatform.ibmcloud.com/tutorials/ru/foundation/8.0/notifications/sending-notifications/#rest-apis>

Question: 53

What is required to enable encryption in the Mobile Foundation JSONStore?

- A. A salt
- B. A password
- C. The server name
- D. A base-64 coded keyword

Answer: B

Reference: <https://mobilefirstplatform.ibmcloud.com/blog/2016/04/01/using-security-in-jsonstore/>

Question: 54

Which statement is true regarding sending notifications using IBM Mobile Foundation?

- A. Only iOS and Android types of device are supported.
- B. The notifications are sent from the Mobile Foundation Server directly to the devices.
- C. The Mobile Foundation Operations Console allows both SMS and push notifications to be sent.
- D. Push notification can be sent either from the Mobile Foundation Operations Console or via REST APIs.

Answer: A

Reference: <https://mobilefirstplatform.ibmcloud.com/tutorials/ru/foundation/8.0/notifications/sending-notifications/#mobilefirst-operations-console>

Question: 55

What command can a developer use to preview a Cordova application's web resources in a browser?

- A. `mfpdev app preview`
- B. `mfpdev app config preview`
- C. `mfpdev preview <browser_type>`
- D. `mfpdev preview <application_name>`

Answer: A

Reference: <https://mobilefirstplatform.ibmcloud.com/tutorials/ru/foundation/8.0/application-development/cordova-apps/>

Question: 56

What type of data is contained in the value of the `_id` of a JSONStore Document?

- A. A user defined unique integer
- B. A user defined alpha-numeric key
- C. An automatically generated unique integer
- D. An automatically generated hash-identifier

Answer: D

**Explanation:**

A JSONStore document is a JSON object with an automatically generated identifier (`_id`) and JSON data. It is similar to a record or a row in database terminology. The value of `_id` is always a unique integer inside a specific collection. Some functions like `add`, `replace`, and `remove` in the `JSONStoreInstance` class take an Array of Documents/Objects. These methods are useful to perform operations on various Documents/Objects at a time.

Question: 57

How does a Mobile Foundation application developer deploy a Java adapter with Maven?

- A. `mvn adapter deploy`
- B. `mvn adapter:deploy`
- C. `mvn install adapter`
- D. `mvn install adapter deploy`

Answer: B

Reference: <https://mobilefirstplatform.ibmcloud.com/tutorials/it/foundation/8.0/adapters/creating-adapters/>

Question: 58

What command is used to globally install the Mobile Foundation CLI from the command prompt without first downloading it?

- A. `npm install mfpdev-cli`
- B. `npm install -g mfpdev-cli`
- C. `node install -g mfpdev-cli`
- D. `npm install -g path-to-cli-.tgz-file`

Answer: D

Killexams.com is a leading online platform specializing in high-quality certification exam preparation. Offering a robust suite of tools, including MCQs, practice tests, and advanced test engines, Killexams.com empowers candidates to excel in their certification exams. Discover the key features that make Killexams.com the go-to choice for exam success.

## Exam Questions:

Killexams.com provides exam questions that are experienced in test centers. These questions are updated regularly to ensure they are up-to-date and relevant to the latest exam syllabus. By studying these questions, candidates can familiarize themselves with the content and format of the real exam.

## Exam MCQs:

Killexams.com offers exam MCQs in PDF format. These questions contain a comprehensive collection of questions and answers that cover the exam topics. By using these MCQs, candidate can enhance their knowledge and improve their chances of success in the certification exam.

## Practice Test:

Killexams.com provides practice test through their desktop test engine and online test engine. These practice tests simulate the real exam environment and help candidates assess their readiness for the actual exam. The practice test cover a wide range of questions and enable candidates to identify their strengths and weaknesses.

## Guaranteed Success:

Killexams.com offers a success guarantee with the exam MCQs. Killexams claim that by using this materials, candidates will pass their exams on the first attempt or they will get refund for the purchase price. This guarantee provides assurance and confidence to individuals preparing for certification exam.

## Updated Contents:

Killexams.com regularly updates its question bank of MCQs to ensure that they are current and reflect the latest changes in the exam syllabus. This helps candidates stay up-to-date with the exam content and increases their chances of success.
