At what FQDN (or IP address) do users access the WebUI Tor an HPE Machine Learning Development cluster?

- A. Any of the agent's in a compute pool
- B. A virtual one assigned to the cluster
- C. The conductor's
- D. Any of the agent's in an aux pool

Answer: C

Question: 104

Your cluster uses Amazon S3 to store checkpoints. You ran an experiment on an HPE

Machine Learning Development Environment cluster, you want to find the location for the best checkpoint created during the experiment.

What can you do?

- A. In the experiment config that you used, look for the "bucket" field under "hyperparameters." This is the UUID for checkpoints.
- B. Use the "det experiment download -top-n I" command, referencing the experiment I
- C. In the Web UI, go to the Task page and click the checkpoint task that has the experiment I
- D. Look for a "determined-checkpoint/" bucket within Amazon S3, referencing your experiment I

Answer: B

Question: 105

A customer mentions that the ML team wants to avoid overfitting models.

What does this mean?

- A. The team wants to avoid wasting resources on training models with poorly selected hyperparameters.
- B. The team wants to spend less time on creating the code for models and more time training models.
- C. The team wants to avoid training models to the point where they perform less well on new data.
- D. The team wants to spend less time figuring out which CPUs are available for training models.

Answer: C

Question: 106

What is a benefit of HPE Machine Learning Development Environment, beyond open source Determined AI?

- A. Automated user provisioning
- B. Pipeline-based data management
- C. Distributed training
- D. Automated hyperparameter optimization (HPO)

Answer: D

Question: 107

What are the mechanics of how a model trains?

- A. Decides which algorithm can best meet the use case for the application in question
- B. Adjusts the model's parameter weights such that the model can better perform its tasks
- C. Tests how accurately the model performs on a wide array of real world data
- D. Detects Data drift or content drift that might compromise the ML model's performance

Answer: B

Question: 108

An ml engineer wants to train a model on HPE Machine Learning Development Environment without implementing hyper parameter optimization (HPO).

What experiment config fields configure this behavior?

- A. profiling: enabled: false
- B. hyperparameters; optimizer:none
- C. searcher: name: single
- D. resources: slots_per_trial: 1

Answer: C

Question: 109

You are meeting with a customer who has several DL models deployed. They want to expand the projects.

The ML/DL team is growing from 5 members to 7 members. To support the growing team, the customer has assigned 2 dedicated IT staff. The customer is trying to put together an on-prem GPU cluster with at least 14 CPUs.

What should you determine about this customer?

- A. The customer is not ready for an HPE Machine Learning Development solution, but you could recommend open-source Determined AI.
- B. The customer is not ready for an HPE Machine Learning Development solution. You could recommend an educational HPE Pointnext ASPS workshop.
- C. The customer is a key target for HPE Machine Learning Development Environment, but not HPE Machine Learning Development System.
- D. The customer is a key target for an HPE Machine Learning Development solution, and you should continue the discussion.

Answer: D

Question: 110
