QUESTION 53

After installing a Magento extension that implements a new class for a site and deploying this to an integration environment, you see it is not working.

In the logs, you discover the following error:

```
The specified /app/generated/code/MyCompany/MyModule/MyClassFactory.php could not be written failed to open stream: Read-only file system
```

How do you fix this?

- A. A support ticket should be filed with Magento Commerce Cloud to fix the filesystem issue.
- B. The extension should be modified so it does not write to `generated` at runtime.
- C. The file should be generated locally and pushed via Git.
- D. The `GENERATED_CODE_WRITABLE` variable should be set to true whenever using extensions.

Correct Answer: B

QUESTION 54

Your project is in a phase where the locales that will be used are still being determined. You need to configure your project in a manner that will allow them to be changed dynamically.

How can you accomplish this?

- A. Remove the `system/default/general/locale` configuration from the `app/etc/config.php` file
- B. Configure `SCD_ON_DEMAND` to true in the `.magento.env.yaml` file
- C. Run the command `vendor/bin/ece-tools locales:unlock` on the environment
- D. Configure `DYNAMIC_LOCALES` in the `SCD_MATRIX` to true in the `.magento.env.yaml` file

Correct Answer: B

Reference: <https://devdocs.magento.com/cloud/live/sens-data-over.html>

QUESTION 55

The merchant wants to offer specific pricing in different currency markets, so you have set up multiple websites to cover each currency.

Now they want customers to be directed to the appropriate website based on the country they are in.

How do you configure this?

- A. Use the Country Mapping in the Fastly settings to map country codes to store views.
- B. In the Project Web UI, enable the Website IP Mapping setting.
- C. Update `magento-vars.php` to detect the country code from the IP address and map it.

D. Build or install a Magento extension that changes the default currency code on application init.

Correct Answer: D

QUESTION 56 After making changes to custom commands in the deploy and build phases, you deploy to Staging. The deployment takes much longer than expected, and Staging is in maintenance mode for most of this time.

What do you do to reduce site downtime?

- A. Set the `SKIP_MAINTENANCE_SCD` variable to `true` in the `.magento.env.yaml` file.
- B. Add a custom command to the `post_deploy` phase to activate deferred deployment.
- C. Move custom commands from the `deploy` phase to the `build` phase.
- D. Update the `SCD_MATRIX` variable to include only necessary custom commands.

Correct Answer: A

QUESTION 57

You want to improve the ability to monitor Production deployments by setting up an email notification system.

How do you achieve this?

- A. Enable Deployment Notifications under Configure Environment > Settings in the Project Web UI
- B. Build a custom module which hooks into the deployment phase and sends emails in real-time
- C. Configure log notifications in the `.magento.env.yaml` file
- D. Use the `magento-cloud environment:deploy:email` command to enable email notifications

Correct Answer: C

Reference: <https://devdocs.magento.com/cloud/env/setup-notifications.html>

QUESTION 58

A merchant with three websites using `en_GB`, `fr_FR` and `de_AT` requires a change in locale to `de_DE` for the German Production website. After running the following command on Production you notice the frontend design of the German website is broken:

```
php bin/magento config:set --scope=websites --scope-code=german general/locale/code de_DE
```

Static content deployment is set up on the `deploy` phase.

Why did this happen?

- A. Static Content is not pre-generated for the `de_DE` locale
- B. `de_DE` is not writeable in `pub/static` and has to be configured via the `.magento.app.yaml` file
- C. The `magento-cloud environment:deploy` command has not been run yet to generate static content for the new locale
- D. `STATIC_CONTENT_SYMLINK` is not configured in the `.magento.env.yaml` file

Correct Answer: C

Section: (none)

QUESTION 59 To secure composer credentials you want to remove the `auth.json` file from the project repository.

How do you do that?

- A. The build phase runs on a separate server and variables are not available there, you must keep the credentials in the `auth.json` file, but you can replace the password with its hash
- B. Add the `env:COMPOSER_AUTH` variable on the project level and make it visible on the build phase
- C. Put the composer credentials into `/mnt/build/.config/composer/auth.json`
- D. Add the `COMPOSER_AUTH` variable with the sensitive option enabled

Correct Answer: A

QUESTION 60 You have created a new Integration branch and did not receive the administrator email with the password reset link.

What is prohibiting the email from sending?

- A. You have not enabled the Magento Email module with `bin/magento module:enable`
- B. The Outgoing Emails setting is disabled under Environment Settings in the Project Web UI
- C. Email is always disabled on all integration branches
- D. You have not configured SendGrid for this environment

Correct Answer: B

Killexams.com is a leading online platform specializing in high-quality certification exam preparation. Offering a robust suite of tools, including MCQs, practice tests, and advanced test engines, Killexams.com empowers candidates to excel in their certification exams. Discover the key features that make Killexams.com the go-to choice for exam success.

Exam Questions:

Killexams.com provides exam questions that are experienced in test centers. These questions are updated regularly to ensure they are up-to-date and relevant to the latest exam syllabus. By studying these questions, candidates can familiarize themselves with the content and format of the real exam.

Exam MCQs:

Killexams.com offers exam MCQs in PDF format. These questions contain a comprehensive collection of questions and answers that cover the exam topics. By using these MCQs, candidate can enhance their knowledge and improve their chances of success in the certification exam.

Practice Test:

Killexams.com provides practice test through their desktop test engine and online test engine. These practice tests simulate the real exam environment and help candidates assess their readiness for the actual exam. The practice test cover a wide range of questions and enable candidates to identify their strengths and weaknesses.

Guaranteed Success:

Killexams.com offers a success guarantee with the exam MCQs. Killexams claim that by using this materials, candidates will pass their exams on the first attempt or they will get refund for the purchase price. This guarantee provides assurance and confidence to individuals preparing for certification exam.

Updated Contents:

Killexams.com regularly updates its question bank of MCQs to ensure that they are current and reflect the latest changes in the exam syllabus. This helps candidates stay up-to-date with the exam content and increases their chances of success.
