OMG-OCUP2-INT200

OMG Certified UML Professional 2 (OCUP 2)

Question: 40

What kinds of arrows connect to central buffers?

- A. object flows
- B. state transitions
- C. unidirectional associations
- D. control flows
- E. message passing
- F. dependencies

Answer: A

Question: 41

What is true when an event does not trigger any transitions in the current state?

- A. The state machine is not well formed.
- B. The handling of the situation is a semantic point.
- C. An exception is raised.
- D. The event is discarded.
- E. The event is deferred until a state is reached that responds to that trigger.

Answer: D

Question: 42

When either a message m or a message q is to be sent-but not both-what kind of operator for combined fragment would be used?

- A. var
- B. break
- C. opt
- D. par
- E. alt

Answer: E

Question: 43

What does reaching the terminating pseudostate mean?

- A. The context object of the state machine is terminated.
- B. The enclosing region is completed.
- C. The final state has been reached.
- D. A completion transition has occurred.
- E. The "do" activity of the current state has completed.

Answer: A

Question: 44

What is NOT a correct assertion?

- A. A model element can be extended by several stereotypes at the same time.
- B. Un-applying a profile from a model deleted stereotypes extending the model.
- C. Stereotypes extending a model element can be retracted at any time.
- D. Stereotypes extending a model element are immutable.

Answer: D

Question: 45

Instances of the Communication Path class connect instances of which classes in a deployment diagram?

- A. Instance Specification and Deployment Specification
- B. Deployment Target and Deployed Artifact
- C. Node and Property
- D. Node and Signal
- E. two Nodes

Answer: E

Question: 46

What is true of outgoing transitions from a fork pseudo state?

- A. are taken serially in arbitrary order
- B. can only exist if the object is declared concurrent
- C. are mutually exclusive
- D. may have guards
- E. must terminate in different regions of a state

Answer: E

Question: 47

Refer to the exhibit.

How many interfaces does the Customer Service component make visible to its clients?

- A. 3
- B. 1
- C. 0
- D. 4
- E. 2

Answer: A

Question: 48

Which list contains only connectable elements?

- A. behavior, connector end, and port
- B. behavior, port and property
- C. port and connector end
- D. connector end, port and part
- E. property, port, and parameter

Answer: E

Question: 49

Triggers on two different transitions originating from two states at different levels of the same state are simultaneously enabled (as shown in the exhibit).

- A. The state machine is not well-formed.
- B. More deeply nested transitions take precedence over those with less depth.
- C. Both transitions are taken in arbitrary order.
- D. The less deeply nested transition takes precedence over those with more depth.

Answer: B

Question: 50

What does a state list represent?

- A. set of states that share a single outgoing transition

- B. notational shorthand for a set of states
- C. set of states that share the same entry and exit actions
- D. list of the substates of a composite state

Answer: B

Question: 51

If the node in the exhibit receives a value, what happens to other values flowing in the diagram containing the node?

- A. nothing
- B. They stop for a time specified by the small circle.
- C. They are aborted.
- D. They stop until the small circle emits a value.

Answer: A

Question: 52

Which must be true in order to use a delegation connector to connect two components?

- A. The components must be related to each other via a dependency.
- B. One component must be part of the internal realization of the other component.
- C. The components must have complex ports.
- D. One component must be a subtype of the other.

Answer: B

Question: 53

What does a structured node contain? (Choose two.)

- A. messages
- B. edges
- C. classes
- D. nodes
- E. lifelines
- F. States

Answer: BD

Killexams.com is a leading online platform specializing in high-quality certification exam preparation. Offering a robust suite of tools, including MCQs, practice tests, and advanced test engines, Killexams.com empowers candidates to excel in their certification exams. Discover the key features that make Killexams.com the go-to choice for exam success.

Exam Questions:

Killexams.com provides exam questions that are experienced in test centers. These questions are updated regularly to ensure they are up-to-date and relevant to the latest exam syllabus. By studying these questions, candidates can familiarize themselves with the content and format of the real exam.

Exam MCQs:

Killexams.com offers exam MCQs in PDF format. These questions contain a comprehensive collection of questions and answers that cover the exam topics. By using these MCQs, candidate can enhance their knowledge and improve their chances of success in the certification exam.

Practice Test:

Killexams.com provides practice test through their desktop test engine and online test engine. These practice tests simulate the real exam environment and help candidates assess their readiness for the actual exam. The practice test cover a wide range of questions and enable candidates to identify their strengths and weaknesses.

Guaranteed Success:

Killexams.com offers a success guarantee with the exam MCQs. Killexams claim that by using this materials, candidates will pass their exams on the first attempt or they will get refund for the purchase price. This guarantee provides assurance and confidence to individuals preparing for certification exam.

Updated Contents:

Killexams.com regularly updates its question bank of MCQs to ensure that they are current and reflect the latest changes in the exam syllabus. This helps candidates stay up-to-date with the exam content and increases their chances of success.
