Question: 75

An employee who has left a company used an application that does NOT support lifecycle management. Is this a task generated by Okta to remind the administrator to offboard the employee?

Solution: Deprovisioning task

- A . Yes
- B . No

Answer: A

Explanation:

Employee leaves an organization

As employees leave an organization, a process can be initiated by various departments to deactivate users. The user

account needs to be deactivated. Deprovisioning deactivates the user account from the Okta Universal Directory. Deprovisioning ensures that persons who are no longer in your organization do not have access to sensitive applications and data.

You can deprovision users in Okta or from an external user store, such as AD or a CRM app, such as Salesforce. Typically, user deactivation is triggered from an external user store and it flows into Okta. In any case, deactivated users are automatically deprovisioned from supported apps. Admins receive an email describing any apps that require them to manually deprovision from users.

Question: 76

Is this a reason to build custom authorization servers in Okta?

Solution: To protect API endpoint owned by a third-part

- A . Yes
- B . No

Answer: A

Explanation:

https://help.okta.com/en/prod/Content/Topics/Security/API_Access.htm API Access Management allows you to build custom authorization servers in Okta which can be used to protect your own API endpoints.

Question: 77

An administrator needs to limit multifactor authentication (MFA) factor type enrollment to end users located in a corporate office.

Is this the feature that the administrator should use to set the corporate office perimeter?

Solution: Password policy

- A . Yes
- B . No

Answer: B

Question: 78

Is this a true statement about deleting Okta user accounts?

Solution: After an account is deleted, an administrator can reuse the deleted user name.

- A . Yes
- B . No

Answer: A

Explanation:

Permanently delete an end user account

You can permanently delete a deactivated user with the Delete button that appears in the directory screen for that user. You cannot undo this deletion. After the deletion, the user is not visible on the People page and is not returned in API responses. However, any log entries that reference the user are maintained. After deletion you can reuse the user name and other identifiers.
